

Swaminathan R (Swami)

Solutions Architect & Developer Relations Lead · AI Native Software Development · India/APAC

Bangalore, India (onsite/hybrid) · Mobile: +91 8296916436 · Email: swami086@gmail.com · GitHub: github.com/swami086 · LinkedIn: linkedin.com/in/swaminathanr1 · Nationality: Dual (Australian / Overseas Citizen of India) · Right to Work: Australia, India, United States (E3 Visa)

Professional Summary:

Staff Solutions Architect & Developer Relations lead with 16+ years across India, Singapore, and Australia, operating at the intersection of Solutions Architecture, Sales and Developer Evangelism in the enterprise software space.

Deep expertise in AI-native software development, developer tooling, and core AI infrastructure. Hands-on with Gemini API, Google AI Studio, Vertex AI & AWS Bedrock for demos, workshops, and developer enablement content and agentic development workflows.

Defined technical GTM and ecosystem strategy for India and ASEAN at GitLab: activated greenfield partner markets across India, Singapore, Thailand, and Vietnam, increasing partner-sourced pipe 5X versus direct GTM and influencing approximately \$10M in business across APJ.

Represented organizations at KubeCon, Kubernetes Community Days (KCD), CNCF, Google and AWS developer community groups, GCP and AWS summits, and Gartner events across the India developer ecosystem.

Hands-on technologist with deep techno-commercial background, specializing in building and activating direct and indirect GTM motions at both C-level and practitioner audiences across digital natives, FSI, mid-market, enterprise, and GCC segments.

At StackGen, drives product development roadmap for AI DevSecOps and AI SRE platforms as a strategic zeroth customer, while building technical assets from the ground up for Fortune 500 and Global 2000 audiences.

Previously served simultaneously as Lead Solutions Architect (Presales) and Developer Relations lead for India and ASEAN at GitLab, building GTM across GSI, hyperscaler (AWS/GCP), channel, and GCC partner ecosystem segments.

Technical Skills:

AI Native & Agents (ML/AI/DL/NLP): LLM/SLM training and inference, vLLM, Triton, TensorRT, TensorFlow, PyTorch, Hugging Face. Agent frameworks: LangChain, LangGraph, Autogen, CrewAI, Mosaic (Databricks). Gemini API, Google AI Studio, Vertex AI, AWS Bedrock, Anthropic, OpenAI. Vector DBs (Qdrant), semantic routing

Developer Experience & DevRel: Technical documentation, sample codebases, developer enablement, technical GTM, ecosystem partnerships, API usability feedback, public speaking

DevSecOps Modernization: Microservices, containers (Docker, Kubernetes), CI/CD, observability (Grafana, Prometheus, ELK). Automation: Terraform, CloudFormation, Puppet, Chef. Cloud-native on AWS, GCP, Azure

Enterprise Development: Java (Spring Boot, Quarkus), .NET, Node.js, Django, Rails. Frontend: React, Next.js, Flutter, Figma (Dev Mode)

Data & Analytics: SQL/NoSQL, data warehousing, lakes, pipelines (Kafka, Spark, Beam), streaming and batch processing

Security & Networking: VPNs, load balancers, firewalls, IDS/IPS. Zero Trust, IAM, SAML, OAuth2, OpenID, Auth0, CNAPP

Platforms & Tooling: Gemini, Google AI Studio, Vertex AI, Cursor, Claude Code, Windsurf, GitLab, GitHub, Vercel, E2B, Kiro, Traycer, AWS Bedrock

Functional Expertise: Developer Relations, Developer Experience, Presales Solutions Architecture, Ecosystem and Partner Development, Customer Success, Business Development, Public Speaking

Education:

Masters in Engineering (Electrical, Telecom), University of Melbourne, 2009 – 2010

Work Experience:

Head of Developer Experience | StackGen | May 2026 – Present | Bangalore, India (Remote)

Responsible for building the Developer experience and Solutions Architecture functions from the ground up for an AI-SRE and agentic infrastructure automation platform (pre-Series A) serving Fortune 500 and Global 2000 enterprises across AWS, GCP, and Azure. Key mandate involves creating /producing technical assets demonstrating thought leadership for Stackgen with the aim of activating the Field Sales / Solutions Architecture teams globally.

Lead and Contribute to the AI-native infrastructure GTM across APJ and EMEA.

Publish technical enablement content including blog posts, sample codebases, and whitepapers establishing thought leadership in AI-SRE and agentic AI infrastructure automation for Stackgen.

Responsibility also includes driving product development roadmap for AI DevSecOps and AI SRE capabilities as strategic zeroth customer, feeding competitive intelligence and use case research to product and engineering teams

Develop indirect GTM strategy with AWS, GCP, and Azure hyperscaler partners for market expansion across APJ and EMEA

Senior Solutions Architect (Ecosystems & Developer Evangelism) | GitLab | Apr 2024 – Dec 2025 | Bangalore, India (Remote) ·

Led ecosystem solutions architecture and developer evangelism across India and ASEAN, building and activating 4 GTM motions spanning GSI, hyperscaler, channel, and GCC partner segments

Served as technical SME for AI-native software development and developer advocacy across greenfield APJ markets including India, Singapore, Thailand, and Vietnam

Key Achievements:

Built and activated channel partner ecosystem across India, Singapore, Thailand, and Vietnam from greenfield in 18 months, increasing partner-sourced pipe 5X versus direct GTM and influencing approximately \$10M in business across APJ

Developed joint solution sales plays and activated new GTM motions with AWS, GCP, and Red Hat, aligning GitLab to an AI-DLC framework for CxO, developer, CTO, and CISO audiences across enterprise and commercial verticals

Created flywheel effect leveraging joint solutions to establish GitLab-centric Center of Excellence across major GSI (TCS), securing 18-month GSI resource commitment for large transaction opportunities

Aligned to 3 partner territory managers across APJ, driving joint solution development, net-new pipe generation for field teams, and developer advocacy as SME for AI-native software development

Senior Solutions Engineer (Developer Advocacy) | VMware Tanzu | Feb 2022 – Jul 2023 | Singapore / Bangalore

Evangelized Tanzu application platform and container infrastructure to developers and platform engineering teams across key APAC accounts and regional partner ecosystems

Won Tanzu platform adoption for major government customer in South India through end-to-end partner solution on budget, delivering approximately \$100K USD in platform revenue

Enabled regional partners on Tanzu application platform through joint GTM and technical enablement, achieving quarterly quota 2 consecutive quarters

Solutions Architect (OpenShift & Developer Platform) | Red Hat | Oct 2020 – Dec 2021 | Bangalore / Sri Lanka

Led open hybrid cloud and infrastructure modernization solutions for emerging APAC accounts, covering OpenShift, Red Hat runtimes, and Ansible automation across containers and platform engineering

Built Red Hat OpenShift partner ecosystem in Sri Lanka, establishing BFSI pipeline and winning OpenShift deployment for major commercial bank with approximately \$400K USD in Red Hat subscriptions

Principal Solutions Architect / Sales Consultant | Oracle Australia | Mar 2017 – Nov 2019 | Sydney

Led strategic NSW enterprise and government accounts across full OCI infrastructure portfolio, driving technology roadmaps, cloud adoption POCs, and presenting at industry and Oracle events

Led IaaS/PaaS solution architecture for major financial institution ERP/EPM SaaS migration, closing \$22M TCV CSA and \$4M IaaS/PaaS credits

Delivered POC and solution architecture for auto insurance BI consolidation to Oracle Cloud, generating \$200K ARR

Architected Ravello lift-and-shift migration for major university, securing \$65K ARR

Drove datacentre consolidation for NSW government account, yielding \$2M in additional license revenue

Solutions Architect / Consultant | Telstra Corp | Jul 2016 – Dec 2016 | Melbourne (Contract)

Presales for data center, cloud, and professional services to enterprise customers

Closed \$3M TCV Nutanix managed private cloud deal for mid-tier enterprise and \$1.3M TCV Australian Government multi-cloud AWS/Azure NFV solution

Consultant (Contract) | Cisco Australia | Jun 2015 – Dec 2015 | Melbourne

Led cloud infrastructure POCs and UCS Director competitive positioning vs HPE OneView for APJC GES/GSP accounts across AWS and Azure multi-cloud environments

Product Manager, Telstra Cloud | Accenture Consulting Australia | Apr 2014 – Apr 2015 | Melbourne (Staff Augmentation)

Productized Telstra CSX cloud and hosted IT offerings with Cisco, VMware, and EMC partners for global cloud build program

Delivered Gen 2 CSX and VMware NSX POCs, managing product roadmap and internal/vendor stakeholder relationships

Network Consulting Engineer | Cisco Systems, Advanced Services | Jan 2013 – Mar 2014 | Singapore

Designed IPNGN migration strategies for tier-1 service providers (AT&T, Verizon Business, Cablevision) across ASR9K, Nexus, CRS, and UCS platforms

Pre-Sales Solutions Consultant / IP Transition Delivery | SingTel | Apr 2012 – Nov 2012 | Singapore

Led WAN/ICT solution validation, RFP reviews, and technical architecture workshops as technical lead across SI, engineering, and partner teams

Network Planning Engineer | SingTel | Apr 2010 – Apr 2012 | Singapore

Managed ConnectPlus MPLS IP-VPN global POP deployment, Tier 3 escalations, and vendor POC evaluations in IP Engineering
