

Realizing \$4M to \$6M in Annual Quantifiable Business Value

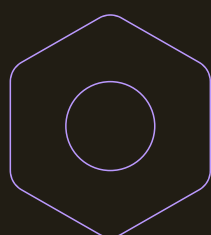

Modeled for a 500-engineer company

AVOIDED INCIDENT COST

\$2.9M → \$4.1M

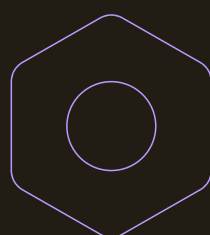

30 to 60 days to realize

HEADCOUNT EFFICIENCY

\$500K → \$1M

0 to 90 days to realize

CLOUD COST & TOOLING

\$300K → \$500K

60 to 90 days to realize

TOOLING CONSOLIDATION

Achieve \$150K to \$400K in optimization, with an expected realization timeline of 6 to 12 months.

AI INFERENCE COST EFFICIENCY

Deliver a 60 to 65% reduction in per-incident inference costs through architectural and deployment efficiencies.
